About Us

High Sierra Showerheads® are the newest and most innovative high-efficiency GREEN shower heads available. The patented technology creates a spray that feels like a much higher-flowing shower head, while saving potentially hundreds of dollars a year in water and energy. All of our shower heads are available with either 1.5 gpm or 1.8 gpm flow rates. When compared to conventional 2.5 gpm shower heads, they use up to 40% less water and energy. We pride ourselves in making innovative products that rise above the competition. We strive to make great shower heads without sacrificing the feel of an amazing shower. This is why we continue to stand by our slogan, “Better Than Low Flow... It’s the Right Flow!”

What Makes Us Different?

What makes our shower heads so unique is our patented Full Coverage Spray™ (FCS™) nozzle. No other shower head on the market comes even close to this design. The nozzle breaks up the stream of water flowing through the shower head and explodes it into a spray of massaging, large droplets of water. These large droplets of water have the strength to rinse even the longest of hair. In addition, a huge advantage of our single nozzle design is that minerals in the water (hard water) will not clog our shower heads, nor will it affect their performance over time. Most other high efficiency shower heads use up to 100 tiny nozzles that clog very quickly. No tiny nozzles = no clogging.

How it Works

Patented (U.S. patent #7,185,830) FCS™ Technology:

A: Water first enters the shower head through our exclusive self-adjusting pressure regulator, which is designed to maintain a constant 1.5 gpm or 1.8 gpm between 30 psi and 80 psi. This feature is extremely important to the performance and enjoyment of the shower head. Unlike other shower head regulators, this design will not clog up from minerals or other solids in the water.

B: All the internal parts, except for the diaphragm, of our shower heads are solid metal and the water fully drains after each use. This is important because metal is much more resistant to bacterial growth than plastic and undrained water inside shower heads can harbor bacteria. Most other shower heads are made of plastic and DO NOT fully drain after each use.

C: The other key component is the patented FCS™ nozzle. As the regulated water flowing through the shower head begins to exit, our FCS™ nozzle breaks the stream into a uniform spray of large droplets.

gpm = gallons per minute
psi = pounds per square inch

Designed and Built in the USA

Our shower heads are manufactured from the highest quality parts and assembled in our factory right here in California. They are individually inspected and built to last. We are located just south of Yosemite National Park in the little town of Coarsegold, CA.

1.5 GPM VS. 1.8 GPM

Shower arm heights vary considerably from bathroom to bathroom. The height of a shower head can affect the level of satisfaction for some people because the shower spray loses energy as it travels from the shower head. The farther one is away from the shower head, the weaker the spray becomes. To ensure the most satisfying shower possible for our customers, we offer 2 water saving flow rates: 1.5 gpm and 1.8 gpm. Either flow rate can be used on any shower arm, regardless of height, but we recommend the 1.8 gpm for those with shower arms over 6.5 ft. from the floor. This is because the droplet size of the 1.8 gpm shower head is larger and heavier, and has greater rinsing power further from the shower head.

Classic™ Shower Heads

Our original shower heads. The perfect choice for those wanting a great shower experience without having to break the bank. At about 2.5 inches long and 1 inch wide, this mighty mite uses less material and energy in its manufacturing, resulting in a small carbon footprint. It’s non-clogging design and easy-adjust swivel makes this a great shower head for any home or hotel. Available in Chrome, Brushed Nickel, Oil Rubbed Bronze, and Polished Brass, with your choice of translucent colors. Optional Trickie Valve also available.
How it Started

David Malcolm (Owner/Founder) has been designing and manufacturing high-efficiency sprinkler nozzles (known as FCI nozzles) for agricultural and golf course irrigation for over 20 years. The result of Malcolm's newest experiment was a nozzle that mechanically explodes a low pressure stream of water into a controlled shower of large, heavy droplets that are uniform in size and distribution.

In 2006, Malcolm saw the tremendous potential this new spray nozzle technology had and in 2010 began manufacturing a low-flow shower head that would provide a pleasing, stimulating shower while saving water, energy, and money.

High Sierra Showerheads® began with a single shower head model and only one finish. Today, we offer over 300 models and 4 finishes. They all incorporate the same proven, non-plugging design that creates the feel of a conventional shower head, but uses up to 40% less water. David Malcolm was awarded a patent for his nozzle technology in 2007.

Reviews

“Wow! I'm tempted to go stick a bucket under this to measure how much water is coming out because I can't believe it's only 1.5 GPM...this thing is fantastic!”
- R. Sutter

“This shower head is amazing. Great force of water with low flow efficiency. I put one in each of my showers and have even bought them for friends who also love them.”
- Proud P.

“This is it! Even though my old shower head was 2.5 gpm, the High Sierra 1.5 gpm provides a better shower and it seems to get me wetter. It gives real drops of water, not a heavy mist. It feels good, too. There is the sensation of more powerful water pressure, a wetter shower, and I save as much as 40% on my water usage. I’d rate this as “Perfect.”
- Amazon Customer

“Wow! This is seriously the best low-flow shower head I have ever used! It feels like a real shower head and not some fine mist! Superb design and super simple to install.”
- Jennifer R.

“So far, this has been a great product. You almost won't believe that it is really using half the amount of water as your 'regular' shower head. The amount of pressure is perfect! Powerful without being painful. Love this! We will probably replace all of the shower heads in the house with these.”
- Amsse

“Great product. It feels like a ton of water. Much better than other water saving shower heads.”
- Bill B.

“Stop reading the reviews and buy this. I switched from the average 10 dollar 1.5 GPM shower head to this one and the pressure is 10 times better! Wish I had bought this years ago.”
- J. Beach

“Better Than Low Flow... It's the Right Flow!”

High Performance and Efficiency all in One Shower Head!

**Saves enough water and energy to pay for itself in as little as 3 months**

55 Gallon Barrel
Classic PLUS™ Shower Heads

All the same features as our Classic™ Shower Heads but made entirely out of metal. The All-Metal Construction make it one of the most durable shower heads ever made and easy to clean, too. As with the original Classics™, they are small in size which makes them ideal for smaller shower enclosures and for over tubs. You will be amazed that such a wide and strong spray of large droplets can come from such a small shower head. Available in Chrome, Brushed Nickel, Oil Rubbed Bronze, and Polished Brass. Optional Trickle Valve also available. In 2014, this was rewarded #1 BEST SELLER on Amazon.com

Classic PLUS™ Handheld Shower Heads

Provides the same patented and unique spray as our Classic PLUS™ Shower Heads, but in a handheld version. The specially designed 90-degree bend and ball joint swivel allows our handheld to work as a dual-purpose shower head; perfect as a fixed shower head when placed in a holder, or as a handheld unit when out of the holder. Its strong, but gentle spray is also perfect for bathing your children and pets. All-Metal construction makes this one of the most durable handhelds ever made and easy to clean, too. Available in Chrome, Brushed Nickel, Oil Rubbed Bronze, and Polished Brass. Additional Purchase Options Include: All-Metal Hose, Solid Brass Holder, Slip-Free Rubber Grip, Trickle Valve.

Tenaya™ Shower Heads

Our premium line of shower heads. Has all the same functions as our Classic™ Shower Heads, but features a stylish, contemporary look. The 5-inch diameter face adds a splash of color to any shower enclosure. Available in Chrome, Brushed Nickel, Oil Rubbed Bronze, and Polished Brass, with your choice of translucent colors. Optional Trickle Valve also available.

Tenaya X™ Shower Heads

For those of us who need a little extension. The Tenaya X™ is our Tenaya™ Shower Head on a 10-inch high-quality adjustable extension arm. The 5-inch diameter face makes it easier to grasp if you want to raise, lower, or swivel in any direction. Now every member of the family can quickly and easily adjust the shower head to the perfect height and angle. Available in Chrome, Brushed Nickel, Oil Rubbed Bronze, and Polished Brass, with your choice of translucent colors. Optional Trickle Valve also available.

Marine and RV Shower Heads

All-Metal construction makes these shower heads the perfect choice for Marine and RV applications. Each model features our patented FCS™ nozzle and exclusive self-adjusting pressure regulator. Popular Trickle Valve included for maximum water savings. Available in fixed and handheld models.

www.highsierrashowerheads.com
Reflections™ Shower Heads
The Reflections™ Series is the first and only fogless mirror and shower head in one. Hot water flowing through the shower head heats up the mirror making it impossible to fog up. No fog-free coatings to rub off, no water to drain after each use, and incredibly easy to keep clean. Ideal for men who enjoy the convenience of shaving in the shower and for women who appreciate the ability to remove makeup in the shower. Each Reflections™ Shower Head comes equipped with our popular trickle valve to allow for quick and easy shut off of the water flow, while using the mirror. Available in Chrome, Brushed Nickel, Oil Rubbed Bronze, and Polished Brass.

Reflections X™ Shower Heads
The Reflections X™ is a combination of our Reflections™ Shower Head and a 10 inch adjustable shower arm extension. Perfect for raising and lowering to get that perfect shower head height. Ideal for men who enjoy the convenience of shaving in the shower and for women who appreciate the ability to remove makeup in the shower. As with the Reflections™, each Reflections X™ Shower Head comes equipped with our popular trickle valve to allow for quick and easy shut off of the water flow, while using the mirror. Available in Chrome, Brushed Nickel, Oil Rubbed Bronze, and Polished Brass.

Public and Outdoor Use
Designed specifically for use outdoors and in public shower facilities. They are made of solid metal (no plastic parts) and can withstand the outdoor weather and temperatures. Stainless steel set screw installed to discourage theft or tampering. Choose between fixed or handheld models. Perfect for pool areas, beaches, backyards, campground, locker rooms, and more.

Accessories
- **All-Metal Handheld Holder**: Made of solid brass, this is one of the most durable handheld shower holders ever made. Attaches straight to your shower arm (no drilling or screws required). Available in Chrome, Brushed Nickel, Oil Rubbed Bronze, and Polished Brass.

- **Extension Arm**: Made of solid brass, our extension arm raises and lowers your shower head a full 10 inches. Adjusts the shower head to the perfect height, regardless of the height of the person taking the shower. Available in Chrome, Brushed Nickel, Oil Rubbed Bronze, and Polished Brass.

- **Hoses**: Solid brass fittings and all-metal hose make these very popular. Offered in 60 and 72 inch lengths. Allows user to reach nearly every corner of the shower with ease. Available in Chrome, Brushed Nickel, Oil Rubbed Bronze, and Polished Brass.

- **Trickle Valve**: Allows user to control the strength of the spray, or shut it off to a trickle, while lathering, for even greater water savings. Available in Chrome, Brushed Nickel, Oil Rubbed Bronze, and Polished Brass.
WaterSense Certified

All of our 1.5 and 1.8 gpm shower heads are now WaterSense certified as well as certified to be compliant with the International Plumbing Codes and the following standards: ASME A112.18.1/CSA B125.1-2012.

WaterSense certification means that our shower heads have been independently tested and certified to not only save water and energy, but to perform as well or better than much higher flowing shower heads. The plumbing codes and standards listings are also very important to our customers because they certify that our shower heads are manufactured with the highest standard of quality. Our certified shower heads can now be specified for new construction projects and will now qualify for many water and power agency rebates and conservation programs that require certifications.

Easy to Install

Installation of any shower head by High Sierra Showerheads® is really easy. Simply install the shower head by hand, turning it clockwise, until it stops. Finish tightening with a crescent type wrench 1/2 to 1 full turn. That’s it, you’re done! The entire installation should take no more than 5 minutes. An installation video can also be found on our website www.highsierrashowerheads.com

New Products

At High Sierra Showerheads® we are constantly looking for new ways to meet the needs of our customers. New products and finishes will be added to our product line throughout the year (please check our website for updates). All of our current products can be purchased from our website (www.highsierrashowerheads.com) and our most popular models can be found on Amazon.com

30-Day Money Back Guarantee

If for any reason you are not 100% satisfied with the High Sierra Showerhead®, you may return it for a refund or exchange. Just return the product to us in like-new condition within 30 days from the date it was shipped to you, and we will refund the full purchase price less shipping costs, which are nonrefundable. High Sierra Showerheads® reserves the right to determine whether a full or partial refund or an exchange is merited based on the condition of the returned merchandise.

2-Year Manufacturer’s Warranty

High Sierra Showerheads® warrants each new shower head it manufactures to be free from defective materials and workmanship. High Sierra Showerheads® agrees to remedy any such defect or replace the unit, at our option, provided the unit is delivered to us, intact, with all transportation charges prepaid to our factory, for a period of 2 years from the date of sale to the original purchaser.
